Professional Summary

A software engineer with 8+ years' experience. Areas of expertise include knowledge of security domain (PKI infra, certificate and communication), implementation of spring java web services and can handle server-side implementation independently. I am a self-motivated person, and ready to learn a new technology stack.

Skills

Java, Data Structures, Spring REST, Spring Data, Basics of C/C++.

Work Experience (8+ years)

Principal Software Engineer

July 2013 – present

Veritas Technologies LLC - Pune, MH

- Work with Security team of the NetBackup product of Veritas.
- Designed and developed REST APIs in Spring Java for security features like, certificate generation, token management for authenticating certificate requests, security configurations, host alias management for peer host identity management and many more services.
- Go-to person for any security issues at webservice side.
- Manage communication with dependent other Dev/QA teams whenever needed.
- Guide team members with their development activities.
- Co-Inventor of 2 US patents in security domain | **Patent 1** | **Patent 2** |
- Work in Agile environment.
- Working on Angular based UI since last one and half year.

Technologies Using: Java, Spring Rest, Spring Data, C/C++, Angular 2+, Typescript.

Software Tool: Eclipse, Postman, git, Apache Tomcat, VS Code

OS Platform: Windows, Linux (RHEL)

Software Intern (5 months)

Jan 2013 – May 2013

Zillious Software Pvt. Ltd - Delhi

- Worked to develop a bus Product in the existing e-commerce travel distribution platform of Zillious, in which any corporate can search bus's availability and book the ticket of their corporate customers.
- To perform operations like bus searching and booking, I consumed the REST based web service APIs provided by redBus.
